

MD SHAMIM

AI-DRIVEN FULL-STACK ENGINEER

PROFESSIONAL PROFILE

Results-driven Full-Stack Software Engineer specializing in the MERN stack, Next.js, and TypeScript. Adept at designing scalable, modular backend architectures and developing dynamic, high-performance web applications. Passionate about integrating AI-driven workflows (LLM, RAG) and deploying robust cloud infrastructures. Seeking a remote software engineering position to leverage advanced problem-solving skills, optimize system architectures, and deliver world-class technology solutions.

SKILLS

- Next.js (App Router, SSR)
- React.js & Tailwind CSS
- TypeScript & JavaScript
- Node.js & Express.js
- PostgreSQL & MongoDB
- Prisma ORM

EXPERTISE

- Full-Stack Development
- API Design & Architecture
- Database Management (DBMS)
- Authentication (JWT, RBAC)
- AI & LLM Integration (RAG)
- Problem-Solving Skills

ACADEMIC SKILLS

- Data Structures & Algorithms
- C++ & Java
- C Programming
- Lex/Flex (Lexical Analysis)
- Presentation & Communication
- Teamwork

SOFTWARE & TOOLS

- Docker & Nginx
- AWS (EC2, S3)
- Git & GitHub

EDUCATION

- 2024 / Present** **BSc in Computer Science and Engineering**
Daffodil International University
Current Status: Ongoing (6th Semester)
- 2021** **Higher Secondary Certificate (HSC)**
Government Shah Sultan College, Bogura
Science Group
- 2019** **Secondary School Certificate (SSC)**
Shabrul High School, Bogura
Science Group

PROJECTS & EXPERIENCE

Full-Stack E-Commerce Platform

NEXT.JS | TYPESCRIPT | NODE.JS | PRISMA | POSTGRESQL | DOCKER

Architected a high-performance e-commerce platform utilizing Next.js Server-Side Rendering (SSR) and Server Actions for optimal SEO and fast load times. Implemented a secure, modular Node.js backend using Express and Prisma ORM, managing complex relational data and dynamic schema relations. Integrated Stripe payment gateway and handled webhooks for secure real-time transactions.

PC Building Hub — SPA Development

REACT | NODE.JS | MONGODB | TANSTACK QUERY | JWT

Developed a dynamic single-page application allowing users to customize and build PCs. Engineered a secure authentication system using JWT with access and refresh tokens, alongside custom role-based route protection for admins and users. Utilized TanStack Query for efficient data fetching, caching, and state management on the client side.

Rentnest — Property Rental System

TYPESCRIPT | NODE.JS | POSTGRESQL | AWS S3 | NGINX

Built a comprehensive property rental management system focusing on a clean, scalable modular backend pattern. Implemented image uploads handling with Multer and cloud storage solutions. Developed comprehensive dashboard visualization features including bar and pie charts for admin analytics. Deployed the application infrastructure using AWS EC2, configuring Nginx as a reverse proxy.

VibeX — Social Media Application

REACT | NODE.JS | MONGODB | SOCKET.IO | TAILWIND CSS

Developed a fully functional social media platform enabling users to create posts, interact via likes and comments, and connect with others. Engineered real-time communication features using Socket.io and built a responsive, modern user interface to ensure a seamless and engaging user experience across all devices.
